PHOENIX, AZ ,85040

FALL OF 2023 TO SPRING OF 2025

EXECUTIVE GENERAL  
WORKSHOP REPORT

## About the Study

Evaluating the environmental justice implications of greenhouse gas (GHG) mitigation strategies such as public transportation electrification, requires a community-informed process and analytical tools.

ASU researchers are working with Unlimited Potential's Community Health Workers, CHISPA Az, and community members to identify and analyze community-proposed transportation projects. This research will provide Maricopa County planning authorities and decision-makers with an equity framework for considering infrastructure projects in the future.

## Summary of Scenarios Discussed in All Communities
